

The ITB Pension Funds (Open Fund): Summary Funding Statement for Period ending 31 March 2011.

The ITB Pension Funds' Trustees who look after the Scheme will provide an update of the Scheme's funding position each year in a statement similar to that shown below. This statement is based on the latest actuarial valuation. It is essentially a snapshot of the financial position of the Fund that is based on the actuarial values of the Fund's assets and liabilities as at the date of the valuation.

The last ongoing funding valuation:

The most recent funding valuation of the Open Fund showed that on 31 March 2010 the funding position was as follows:

Assets	£620.2 million
Liabilities	£671.5 million
Funding level	92%

The estimated amount as at 31 March 2010 needed to ensure that all members' benefits could have been paid in full if the Scheme had started winding up (full solvency) was £874.9 million. Therefore, the Scheme was 71% funded on a full solvency basis as at 31 March 2010. Inclusion of this information is a standard requirement and is not related to any consideration of the Trustees to wind up the scheme.

Change in funding position:

The Scheme Actuary carried out an interim review of the Open Fund as at 31 March 2011. The purpose of that review was to assess how the Scheme's funding position has changed over the previous year.

This interim review showed that the funding level increased from 92% to 98% between 31 March 2010 and 31 March 2011. The increase in funding level reflects higher than expected investment returns on the Scheme's assets, the payments made by Skillfast-UK and JTL in respect of their withdrawals from the Scheme during 2010 and the deficit contributions paid by participating employers since January 2011.

Actions to return the Scheme to full funding:

The Participating Employers have agreed to pay additional contributions to the Scheme to restore the Scheme to full funding. Additional contributions will be paid for between 7 and 10 years from January 2011. Where such contributions extend beyond 7 years, Employers have agreed to provide additional security to the Scheme.

Payment to the Participating Employers:

There has not been any payment to the Participating Employers out of Scheme funds in the last twelve months.

How the Scheme operates:

How is my pension paid for?

The Participating Employers pay contributions to the Pension Scheme so that the Scheme can pay pensions to its members when they retire. Active members also pay contributions to the Scheme, and these are deducted from gross pay.

The money to pay for members' pensions is held in a common fund. It is not held in separate funds for each individual.

How is the amount the Scheme needs worked out?

The Trustees obtain regular valuations of the benefits earned by members. Using this information, the Trustees come to an agreement with the Participating Employers on future contributions.

The importance of the Participating Employers' support:

The Trustees' objective is to have enough money in the Scheme to pay pensions now and in the future. However, success of the Scheme relies on the Participating Employers continuing to support the Scheme because:

- the Participating Employers meet the administrative expenses of running the Scheme
- the funding level can fluctuate, and when there is a funding shortfall, the Participating Employers will usually need to put in more money
- the target funding level may turn out not to be enough so that the Participating Employers will need to put in more money.

What is the Scheme invested in?

The Trustees' strategic target (which will be subject to periodic variation) is to invest in a broad range of assets subject to asset class targets as follows:

Global equities	28%
Bonds/LDI mandate	30%
Alternative Investments	26%
Property	13%
Cash	3%
